

8-way L-band Active Splitter

DIV08L1A-2397 is a 8-way L-band active splitter with unity gain, flat frequency response with integral regulator. All RF ports are DC blocked. It requires 12 to 24V DC bias which is also provided on the common port for LNB or BUC biasing.

This component is available with the following RF connector options: 50 Ω SMA, N-type, BNC and 75 Ω BNC or F-type.
