# 64 x 64 Vortex Extended L-band Combining Switch Matrix / Router New compact design \& enhanced RF performance 

## Typical applications:

- Live news \& sport traffic for larger teleports.
- High capacity signal monitoring of satellite traffic.
- RF content acquisition for TVRO \& IPTV headends.
- Remote controlled unmanned satcom sites.

ETL's Vortex Extended L-band matrix has been redesigned to now offer an extremely compact form factor, and enhanced RF performance. Vortex uses leading edge technology switching cards, giving excellent RF performance in a compact chassis.

850-2450 MHz
operating frequency range
Improved RF
Performance including
noise figure, return loss,
OIP3 \& isolation

Local control \& monitoring via front panel capacitive touchscreen

Expansion in blocks of 16 or with additional matrix modules for larger systems

Minimal impact from failure with hot-swap RF cards, power supplies, CPU \& fans
Compact up to 64 inputs \& 64 outputs housed in a 5 U high chassis

Resilience from dual redundant power supplies \& CPU modules

## Self diagnostics with

continuous monitoring of amplifiers, CPU's \& PSU's

Note: Rear image shows distributive model

Remote control \&
monitoring via RJ45 Ethernet port with SNMP \& web browser interface
