With switchable 13/18V & 22KHz tone & current monitoring (via RS232/422/485 Serial Port)

Front View of Model 2764-F7F7

This ETL LNB hot swap power supply unit, provides DC power for up to 16 LNBs. This can be switched between 13/18/0V and 22KHz tone on/off, both locally on the rear panel and remotely via a serial port. LNB current monitoring can also be done via the serial port on the rear panel, and front panel tri-colour LED's provide a visual status for each LNB port.

This unit also benefits from dual redundant hot-swap power supplies, which can be removed via the front panel. Each power supply has a status LED and can also be monitored via a dry contact alarm port on the rear panel.
