

# StingRay RF Over Fibre Genus Module

Broadband modules with 22KHz and 13V/18V switchable LNB power

**Typical applications:**

- Teleports & Earth Stations
- Satellite Operations
- Government & Defence applications
- Telemetry, Tracking & Command
- High Resilience applications

StingRay Broadband Transmit and Receive RF Over Fibre modules to fit Genus 1U chassis. The transmit module can provide LNB power 13/18VDC, 22kHz tone up to 500 mA. When fitted with a 10 MHz distributing module the TX/RX module can inject an external or internal 10 MHz tone onto the L-band feed.

## Fibre Module

### Fibre Module

Compact form factor allowing multiple modules to be housed in the Genus chassis. Each module occupies 1 slot in the chassis.

**TX & RX** module options to transmit and receive signals up to 10 km

**50 - 3150 MHz** operating frequency range

**Hot Swap & replaceable** RF module

**LNB Powering** 13/18V on TX modules only

**High isolation** between modules for signal quality

## Chassis Options

**Local control & monitoring** via HMI high resolution touchscreen

**Flexible Module Configurations** choose from a mixture of fibre modules with different operating frequencies.

**Resilience** from dual redundant hot-swap power supplies & field replaceable CPU & HMI

**Remote control & monitoring** via RJ45 Ethernet port with SNMP & web browser interface

**Compact indoor & outdoor** chassis options, which can be part populated

**Field replaceable Internal 10MHz reference source** and external reference inject port with auto detection (optional)

**Secure protocols** with SNMPv3 and HTTPS
