

SpacePath 400W C-Band Rack Mount TWTA

The new generation of STR Series rack mount TWTA's provide an easy to operate, colour touch screen interface with a multi-functional selector wheel. The colour touch screen display provides clear, easy to read status of the amplifier's operation, including: RF output power monitoring, heater, helix monitoring, & TWT temperature. Set up screens are intuitive and simple to manage and the touch panel allows full local control and monitoring of all amplifier parameters, including automatic level control, system event logging and graphical trend analysis. Remote control operation can be made via RS485 or through an Ethernet interface, and a web page interface is also available. If a redundancy system is required, this can be set up and controlled via the touch screen. Changes to operating parameters can be locked and password protected if required.

The HPA incorporates a high efficiency multi-collector TWT powered by an advanced power supply built on over 30 years of experience in the design and manufacture of satellite amplifiers. The company's products have an enviable reputation for performance, robust quality and reliable service.

The STR1140 is available with a wide range of options and accessories, backed by round-the-clock, worldwide technical support.

Options

- Integral solid-state amplifier (SSA)
- L-Band Block upconverter
- 10MHz reference
- Lineariser
- Redundant system control
- Quick connect waveguide options

Features

- Compact 4RU enclosure
- Touch screen control
- Ethernet interface
- Remote diagnostics
- Forward and reverse power monitoring
- TWTA performance Data and Event logging

Options

Extensive options are offered with the STR1140 and include; integral pre-amplifiers, gain control, linearisers and block upconverters.

Input Options

The STR1140 can be offered with an L-Band Block Upconverter. Specify:

N - Standard RF

U - L to C-Band Block Upconverter (see page 5)

Frequency Options

The following frequency options are available

Ref	Frequency Range (GHz)	BUC Option
CC1	5.85—6.425	Yes
CC2	5.85—6.65	Yes
CC3	5.85—6.75	Yes
CC4	5.85—7.025	Yes
CC5	5.725—6.725	Yes
CC6	6.725—7.025	Yes

Note

The upconverter requires the inclusion of the 'D' and 'Z' option

Pre-Amp Option

The pre-amp option can be selected from any of the following:

A - Integral solid-state amplifier (typical SSG 78 dB)

D - As option 'A' but includes an attenuator to provide 25 dB (min) of gain control

Z - Integral lineariser that improves the linearity of the HPA, providing a C/I of typically -26 dBc at 4dB OPBO.

The lineariser also incorporates the pre-amp and gain control options.

(Consult ETL Systems for availability)

Performance with Integral Block Upconverter		
L-Band input Frequency range option:	CC1	950 to 1525 MHz
	CC2	950 to 1750 MHz
	CC3	950 to 1850 MHz
	CC4	950 to 2125 MHz
	CC5	950 to 1950 MHz
	CC6	950 to 1250 MHz
LO frequency All options		4.9 GHz
External reference (see note):		Frequency 10 MHz Level -3 to +7 dBm Impedance 50 Ω
Gain Variation		Over Any 575 MHz band 4.0 dB max Over any 40 MHz band 1.5 dB max
Phase Noise Continuous		meets IESS phase noise profile
Input VSWR (non-operating)		1.6:1 max

Note

The BUC can be operated without the external reference, typical frequency stability ± 0.25 ppm.

Options

Extensive options are offered with the STR1140 and include; integral pre-amplifiers, gain control, linearisers and block upconverters.

Health and Safety Hazards

SpacePath satellite amplifiers are safe to handle and operate provided that the relevant precautions are observed. ETL Systems does not accept responsibility for damage or injury resulting from the use of electronic devices it produces.

High Voltage

Dangerous voltages are present within the TWT amplifier when operating normally. However, the equipment is designed so that personnel cannot come into contact with high voltage circuits unless covers are removed.

RF Radiation

All RF connectors must be correctly fitted before operation.

Beryllia

The TWT in the amplifier contains Beryllium Oxide ceramic parts. These are not accessible unless the TWT casing is damaged. Consult Spacepath Communications regarding the disposal of damaged or life expired tubes
